DESCRIPTION:

This eco friendly tour explores the Stirling Range Retreat and Stirling Range National Park areas, following kangaroo trails or exploring from road edges to protect this delicate habitat. The tour changes daily to cover orchid and wildflower hotspots and to discover well camouflaged blooms hidden under bushes. The region is world renowned for its plant diversity and large number of endemic species. We recommend wearing comfortable, enclosed, non-slip shoes and layered clothing as the weather can be a little unpredictable at times. Don't forget to bring along a camera and a pen to enhance your experience.
